About the Author xix

CHAPTER 1

BUILT TO MOVE 1

Design 2
Aesthetic Considerations 2
Technical Considerations 4
Understanding Reference 4
Modeling: Form 8
Using Reference 8
Basic Modeling Tips 13
Modeling Techniques 15
Starting With Primitives 15
Extruding Shapes Or Faces 16
Using Booleans 16
High Resolution Mesh Template 17
Patch Modeling With Surface Tools 20
Surface Issues 21
Optimization 29
Modeling: Function 31
Model Breakdown 31
Animation Accommodation 32
Neck and Head 33
Shoulders 34
Waist 35
Hips and Rear 35
Elbows and Knees 37
Hands and Fingers 37

vii
Rigging Your Characters with Biped

Setting up a Typical Biped
Steps to Setting up a Biped Rig
Loading Your Character’s Mesh
Creating Your Biped
Adjusting the Structure of Your Biped
Adjusting the Biped’s Body and Head
Adjusting the Biped’s Arms and Legs
Saving the Biped’s Pose
Rigging a Four-legged Character
Adjusting the Structure
Adjusting the Body, Head, and Tail
Adjusting the Legs and Arms
Other Types of Character Rigs
A Dog
A Dolphin
A Goat-Girl?
Facial Rigs
Face Rig Level 1
Face Rig Level 2
Face Rig Level 3
A Higher-Resolution Character Rig
Ta Da Vinci or Not Ta Da Vinci?
A Face Rig for a Higher-Resolution Mesh
Adding Bones and Using Different Controllers
Summary

Weighting a Character Using Manual Vertex Assignment

A Typical Game Character
Steps to Applying Physique
Applying and Initializing Physique
# Contents

Assigning Vertices to a Link ................................. 95  
Typing in Weighting Values ................................. 99  
Removing Vertices from Links .............................. 105  
Adjusting the Elbow Area ................................. 107  
Working on the Hand and Fingers ......................... 113  
Saving Your Weighting Values ........................... 116  
Assigning the Neck, Shoulders, and Torso ............. 117  
Weighting the Other Leg .................................. 120  
Loading a .Bip File into Biped ............................ 123  
Tackling the Hips ........................................... 125  
Adjusting the Gun Arm .................................... 128  
Summary ....................................................... 133

## Chapter 4  
### Weighing a Character Using Envelopes  

137  
Conquering Envelopes ....................................... 138  
Steps to Applying Physique ................................ 138  
Turning Off Unnecessary Envelopes ....................... 139  
Adjusting the Radial Scale of the Envelopes .......... 144  
Adjusting the Parent/Child Overlap of the Envelopes 147  
Copying and Pasting to Symmetrical Limbs ............ 150  
Removing Any Vertices from Links ...................... 153  
Weighting the Waist, Hips, and Legs .................... 153  
Resorting to Type-in Weights .............................. 156  
Assigning the Breast Vertices ............................ 158  
Adjusting the Head and Face ............................. 163  
Summary ....................................................... 168

## Chapter 5  
### Things to Consider Before You Animate  

171  
Know Your Character ........................................ 172  
Appearance Dictates Identity ............................ 173  
Uniqueness Required ...................................... 174  
The Animation Set ......................................... 175  
Genre ......................................................... 175  
Environment ............................................... 177  
Size Still Matters ......................................... 177  
Game Controls ............................................. 179  
Game Technology .......................................... 180  
Keyframe or Motion Capture? ............................. 181  
Keyframing Defined ........................................ 182
Contents

When to Keyframe 183
When to Use Mocap 183
Tips on the Mocap Process 184
Implementing the Character 186
Perpetual Windup Toy 187
Fitting the Technology 188
Summary 189

CHAPTER 6  KEYFRAME ANIMATION: PART I  191

First Things First 192
  Footsteps versus Freeform 192
  Think Animation Folder 192
  Preparing the Biped 193
Keyframe Animation Basics 196
  Frame Zero 196
  The Track View 197
  Configuring Time 200
  Copying Keyframes 201
  Animation Space Buffer 202
  Track View and Active Animation Range 204
  Posing the COM and Limbs 204
  Locking Down the Feet and Hands 205
  Refining the Idle Pose 207
  Tension, Continuity, and Bias 209
  Ease To and Ease From 212
  Keyframes and the Time Slider Bar 216
  Keyboard Shortcut Override Toggle 217
  Secondary Motion 219
  Animating the Tail 220
  Using Layers 224
  Using Time Tags 229
Summary 231

CHAPTER 7  KEYFRAME ANIMATION: PART II  233

Betty’s Animations 234
  One Chick, One Gun 234
  Special Moves 235
Idles 235
  It’s All in the Pose 236
Anchor Keys 238

Using the Motion Flow Editor to Rotate the Biped 325
Adding Secondary Motion with Layers 331
Deleting Frames to Increase Impact Effect 336
Repurposing a Mocap File 337
Copying Posture 338
Loading the Getting-Hit Animation 340
Paste Pose/Posture/Track 341
Moving the COM 341
Creating the Firing Motion 343
Moving the Recoil Closer 344
Aligning the Right Foot by Moving the COM 344
Adjusting the Upper Body 348
Making Adjustments with the Set Multiple Keys Function 351
Summary 354

CHAPTER 9 PUTTING IT ALL TOGETHER 357
Motion Flow Mode 358
Preparing an Animation for Motion Flow 358
Creating the Motion Flow Script 361
Adjusting Transition Length between Motion Clips 366
Rotating Motion Clips 366
The Export Process 372
Installing the WildTangent 3DS Max 4 Exporters 373
Creating and Exporting an Actor 374
Exporting an Actor with Animations 376
Final Thoughts 379

APPENDIX ABOUT THE CD-ROM 381
Recommended System Requirements 381
Chapter Directories 381
Demo Files 382
